Abstract: IPEDS is a system of surveys designed to collect basic data from approximately 10,000 postsecondary institutions in the United States. The IPEDS provides information on numbers of students enrolled, degrees completed, other awards earned, dollars expended, and staff employed at postsecondary institutions. The amendments to the Higher Education Act of 1998, Part C, Sec. 131, require the National Center for Education Statistics to provide cost and pricing information from postsecondary institutions. As a consequence in 1999 the IPEDS is proposing piloting a web-based data collection for this information in addition to the paper forms previously cleared.

All the surveys conducted under the

QRIS are required to inform for current policy issues for which there are no other timely and/or appropriate data available. In recent years surveys have been conducted on topics as diverse as distance education in postsecondary education, services for students with disabilities in postsecondary education, advanced telecommunications in the elementary and secondary schools, summer programs for migrant students, and teacher quality.
